

RADIATOR LEAK COVER

Product Description:

RADIATOR LEAK COVER

Additive to cover leaks in the refrigeration circuit. engine block, cylinder head gasket, radiator, heater core and block plugs.

Withstands high pressures, even at the head gasket.

ADVANTAGES

- Repairs small leaks in the refrigeration circuit.
- Protects against corrosion and oxidation.
- Clean the radiator system.
- Eliminates oxides and residues.
- Helps achieve optimal radiator functionality.
- Does not affect rubbers or joints.
- Suitable for all radiators.
- Compatible with all types of refrigerants.
- Adapted to any type of engine and radiator.
- It is not necessary to drain the cooling circuit before application.

HOW TO USE

1. Start the engine and connect the heating.
2. Add the product to the engine coolant, pouring it into the radiator or, failing that, into the expansion tank.
3. Let the engine warm up for 10 minutes or drive the vehicle normally.
4. Check the level of the cooling water. Level up if necessary.

PRESENTATION

- 230 ml
