SECTION 5: Firefighting measures		
5.1. Extinguishing media		
Suitable extinguishing media Unsuitable extinguishing media	Water spray. Dry powder. Foam. Carbon dioxide.Do not use a water jet since it may cause the fire to spread.	
5.2. Special hazards arising from the subs	tance or mixture	
Fire hazard Explosion hazard	 Will ignite if exposed to intensive heat. Not expected to be a fire/explosion hazard under normal conditions of use. Heat may build pressure, rupturing closed containers, spreading fire and increasing risk of burns and injuries. 	
Reactivity in case of fire	: Incomplete combustion releases dangerous carbon monoxide, carbon dioxide and other toxic gases.	
Hazardous decomposition products in case of fire	: Toxic fumes may be released.	
5.3. Advice for firefighters		
Precautionary measures fire Firefighting instructions	 Evacuate area. Eliminate all ignition sources if safe to do so. Use water spray or fog for cooling exposed containers. 	
Protection during firefighting	: Do not attempt to take action without suitable protective equipment. Self-contained breathing apparatus. Complete protective clothing.

Protective equipment	: Do not attempt to take action without suitable protective equipment. For further information refer to section 8: "Exposure controls/personal protection".	
6.2. Environmental precautions		
Avoid release to the environment.		
6.3. Methods and material for containment	and cleaning up	
For containment	: For large spills, confine the spill in a dike and charge it with wet sand or earth for subsequent safe disposal.	
Methods for cleaning up	Take up liquid spill into absorbent material. Clear up spills immediately and dispose of waste safely. Sweep or shovel spills into appropriate container for disposal. This material and its container must be disposed of in a safe way, and as per local legislation. May be reused following decontamination. Clean contaminated surfaces with an excess of water.	
Other information	: Dispose of materials or solid residues at an authorized site.	

6.4. Reference to other sections

For further information refer to section 13.

SECTION 7: Handling and storage		
7.1. Precautions for safe handling		
Additional hazards when processed Precautions for safe handling	 Empty containers retain product residue and can be hazardous. Wear personal protective equipment. Avoid contact with skin, eyes and clothing. Do not ingest. Do not breathe fumes from fires or vapours from decomposition. Avoid breathing dust, fume, gas, mist, spray, vapours. Ensure good ventilation of the work station. Spilled material may present a slipping hazard. Clean spills promptly. 	
Handling temperature Hygiene measures	 ≤ 40 °C Routine housekeeping should be instituted. Do not eat, drink or smoke when using this product. Always wash hands after handling the product. 	
7.2. Conditions for safe storage, includi	ng any incompatibilities	
Technical measures Storage conditions	 Provide local exhaust or general room ventilation. Store in a well-ventilated place. Keep cool. Store away from oxidising agents. Protect from sunlight. Store in original container. Always keep in containers made of the same material as the supply container. Do not store in open, inadequate, mislabled packaging. Opened containers must be carefully closed and kept upright to avoid leakage. Empty containers should be taken for recycling, recovery or waste in accordance with local regulation. Empty containers retain product residue and can be hazardous. 	
Storage temperature Information on mixed storage Storage area Special rules on packaging	 ≤ 40 °C Store away from strong oxidizers, strong bases, strong acids. Store at ambient temperature. Keep container tightly closed and dry.
