

# OCTANE BOOSTER

## Product Description:

### OCTANE BOOSTER

Antiknock solution for the additivation and enrichment of leaded or unleaded gasoline. Formulated based on R.O.N. (Research Octane Number), improves the octane number by up to 4 points.

### ACCORDING TO DOSAGE:

Up to 1 point, applying a bottle for 70 L  
Up to 2 points, applying a bottle for 60 L  
Up to 3 points, applying a bottle for 40 L  
Up to 4 points, applying a bottle for 15 L

### BENEFITS

- Significantly improves the ignition point of the fuel and its operational flexibility, thus increasing the performance of the vehicle.
- Prevents detonations and/or incomplete combustion, reducing the consequent formation of soot.
- It facilitates start-up and reduces the emission of polluting gases derived from unburned hydrocarbons.
- Suitable for any gasoline engine: carburation, injection, with or without catalytic converter, etc.

### HOW TO USE

Apply preferably before refueling to ensure a homogeneous mixture with the fuel to be treated.

### PRESENTATION

230 ml
