

# ANTI-SMOKE

## Product Description:

### ANTI-SMOKE ITV DIESEL AND GASOLINE

Specific product to prevent the emission by exhaust of smoke and pollutants produced by the bad combustion of fuels, which currently would prevent it from passing the technical inspection of vehicles (ITV).

A single application of **ANTI-SMOKE ITV** is enough to guarantee and pass the ITV without problems, as long as there is no serious fault. **ANTI-SMOKE ITV** is only active when it is being consumed, and stops being so when refueling again.

### ADVANTGE

- Reduces pollution.
- Absorbs water.
- Does not affect the catalyst.
- It facilitates cold start.
- Eliminates fumes.
- Improves combustion.
- It is not a corrosive product, therefore, it does not damage metals or the internal components of the engine.

### HOW TO USE

1. With the fuel tank in reserve, pour the contents of a bottle of **ITV ANTI-SMOKE** into the tank.
2. Next, refuel to mix the product well; Maximum 15 liters of fuel for 230 ml of product.

It is not abrasive, so it does not require the use of gloves for its use.

230 ml of **ANTI-SMOKE ITV** treat 15 liters of fuel.

### PRESENTATION

- 230 ml
